

New Alternatives for Determining Park Needs and Level of Service

David Barth, PhD
AICP, CPRP, RLA

 **Barth Associates**
PUBLIC REALM PLANNING, DESIGN, AND FACILITATION

“A major problem for [park] advocates and managers is that parks seem relatively simple and straight forward. People frequently say , “It’s not rocket science, it’s just a park” No! For rockets... you need to be good at math. Parks require math plus horticulture, hydrology, psychology, sociology and communication”. They are immensely complicated.”

A 50 YEAR, UNIFYING VISION FOR A LIVABLE, SUSTAINABLE MIAMI-DADE COUNTY

"When we build let us think that we build forever. Let it not be for present delight, nor for present use alone; but let it last; work for our descendants with them as for us, and let us think, as we lay down our heads, that a star is to come when those doors will be fondly opened because our hands have touched them!"
 John Ruskin

PRINCIPLES
of a livable, sustainable miami-dade county

Equity
 every resident should be able to enjoy the same quality of public facilities and services, regardless of income, age, sex, ability or geographic location

Access
 every resident should be able to safely and comfortably walk, bicycle, and use all types of public transit from home to work, school, parks, shopping and community facilities

Beauty
 every public space, including streets, parks, plazas and civic buildings, should be designed to be as aesthetically pleasing as possible, and be complementary to the natural and cultural landscape

Multiple Benefits
 every large public space should generate multiple public benefits to its surrounding urban fabric

Seamlessness
 every part of the County, including neighborhoods, parks, transit, water, trails, and other recreational areas, should be connected without regard for jurisdiction

Sustainability
 natural resources, including water, wildlife, habitat, and open space, must be protected for future generations

VISION

Great Parks
 are accessible to everyone regardless of age or ability

Great Public Spaces
 are designed to engage residents

Great Natural and Cultural Places
 are planned and managed to balance access and resource protection

Great Streets
 are designed as linear parks

Great Greenways, Trails and Water Trails
 connect every resident to places throughout the community

MIAMI-DADE COUNTY
 Parks and Open Space System Master Plan

OVERVIEW

Parks and Recreation System (Public Realm)

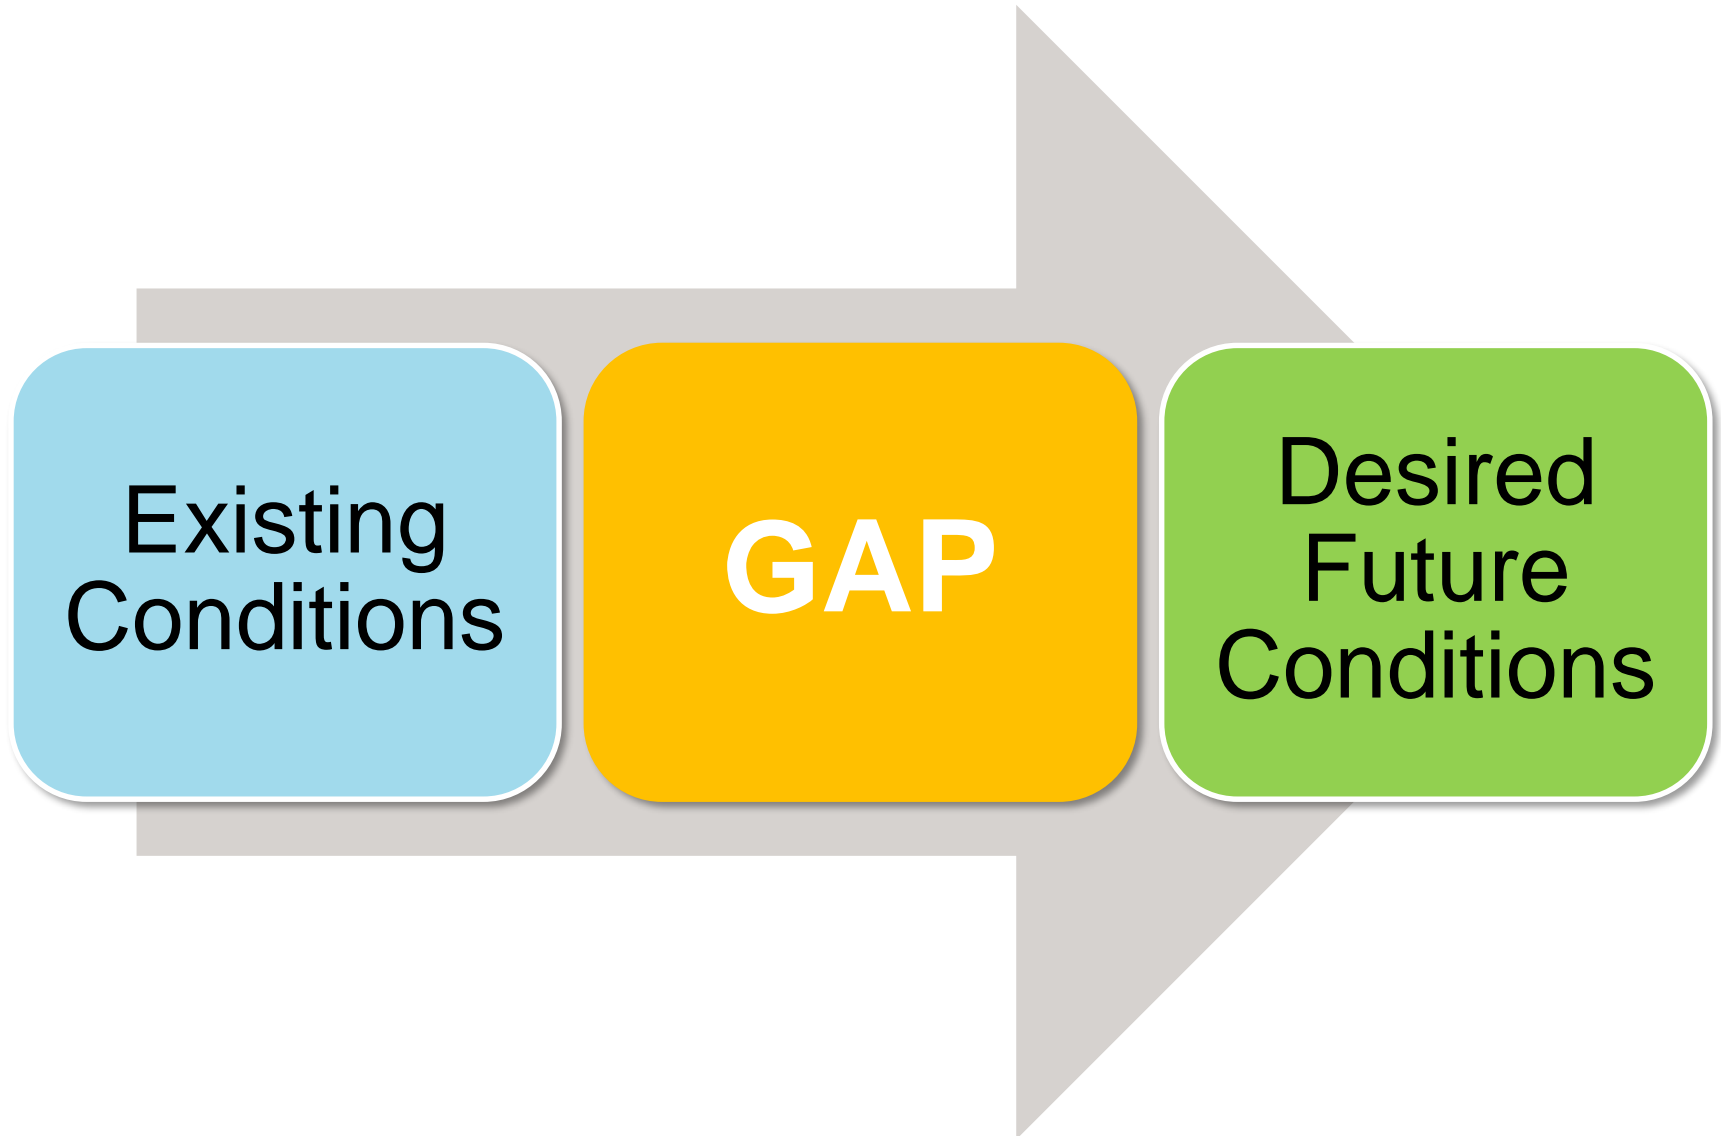

Parks and Recreation System Master Planning Process

1. Existing System Analysis
2. Needs and Priorities Assessment
3. Long Range Vision
4. Implementation/ Action Plan
5. Final Parks and Recreation Plan Document

Needs Assessment

Typical Needs Assessment Techniques

Quantitative:

- Statistically-Valid Survey
- On-line Survey (non-statistically representative)
- Level of Service Analysis

Qualitative:

- Interviews, Focus Groups
Public Workshops
- Interactive Web Sites

Anecdotal:

- Previous Planning Documents
- Site Evaluations
- Operations Assessment
- Program Assessment
- Bicycle and Pedestrian Connectivity
- Trends Analysis

Summary of Needs

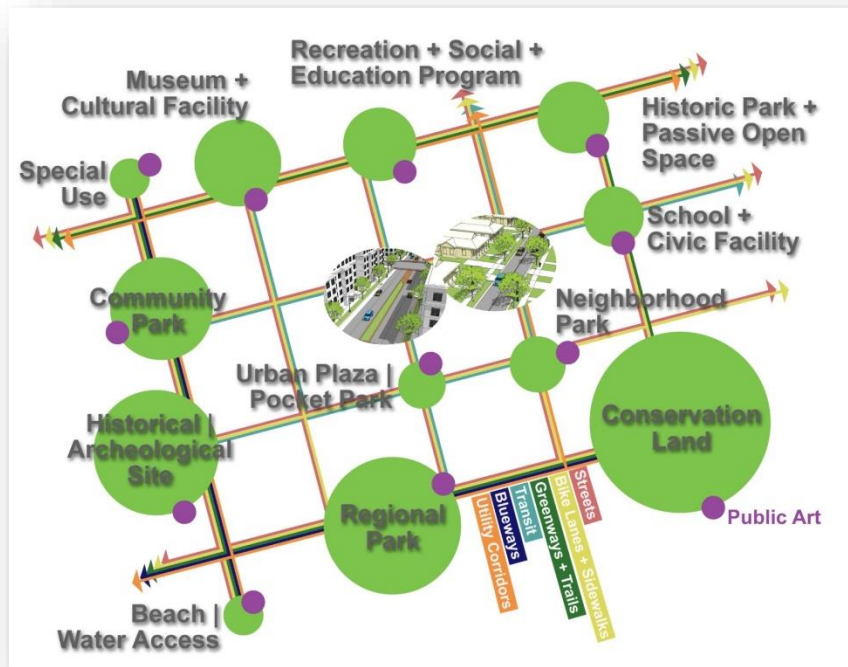

- ▾ - High priority need
- ▾ - Priority need

Centralized Model

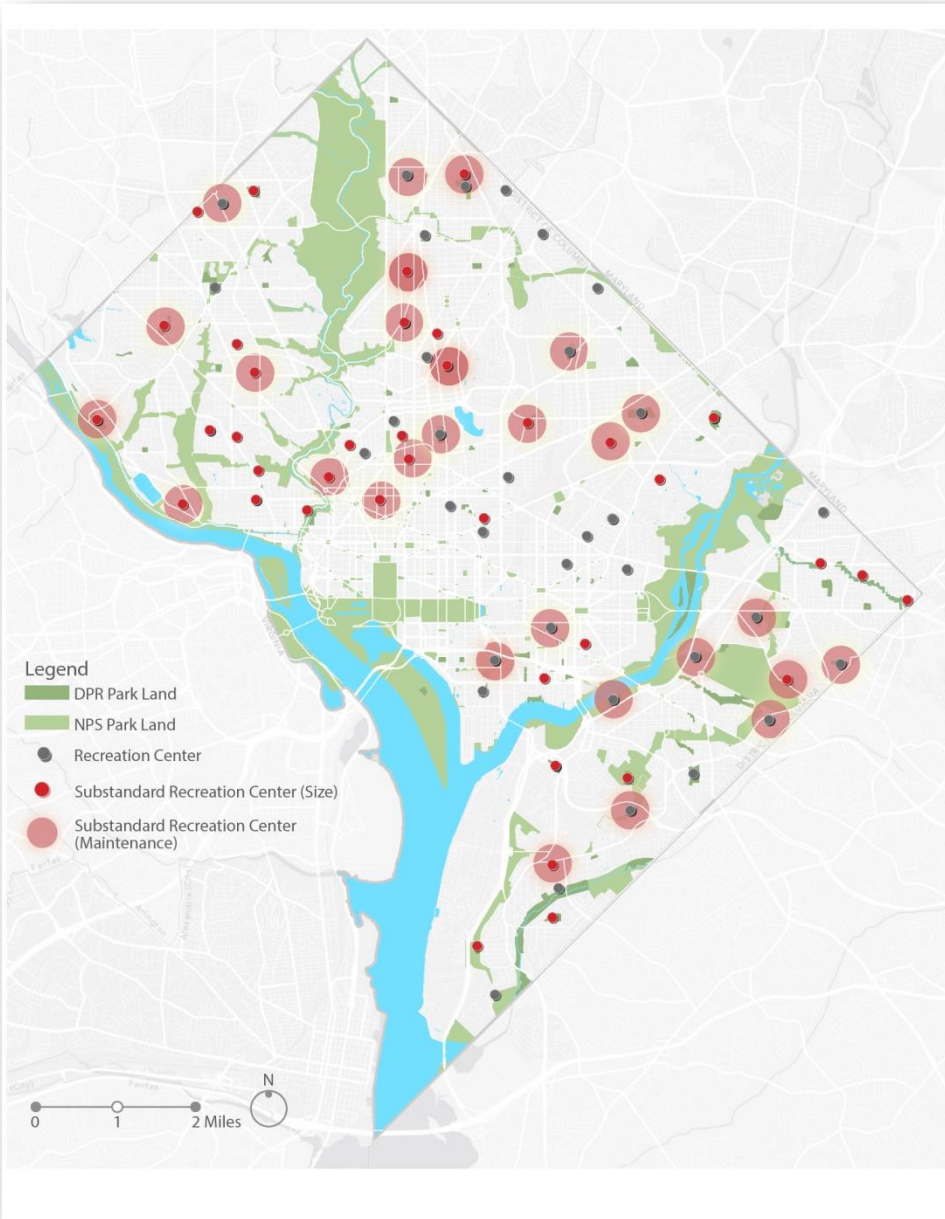

Millenium Park

De-centralized (Equity) Model

Washington, DC Recreation Centers

- 74 Recreation Centers
- 956,849 total square feet

40 Recreation Centers do not meet minimum DPR Vision standards

28 Recreation Centers are in Poor/Fair Maintenance Conditions (DGS Facilities Assessment, 2013)

Venues Model

City of Naples, FL

City of Fernandina Beach

The long-range Vision for the City of Fernandina Beach Parks and Recreation System includes five key elements: 1st Class Venues, Improved Connectivity and Accessibility, Equitable Neighborhood Access, Improved Communications, and Improved Design and Maintenance.

The City's Parks and Recreation Advisory Committee (PRAC) should work with the City to prioritize these improvements and make recommendations to the Commission regarding top priorities over the next five years. The Pyramid to the right illustrates a potential framework for how to prioritize improvements to gradually transform the City's major parks and recreation facilities into specialized, 1st class public venues that serve the entire community.

The Amelia River Waterfront is envisioned as a redeveloped, pedestrian-oriented gathering/festival space along the river with adequate space provided for strolling, bicycling, vendors' carts, festival booths, cafe tables and chairs, a trolley stop, and other visitor amenities.

Amelia River Waterfront Park, Florida
Narasimha, Florida

Amelia River Waterfront Transformed into a 1st Class Waterfront

Central Park is envisioned as the City's central gathering space, as established in the town's original plat. Proposed uses include a central, multi-purpose lawn for festivals, softball/baseball ball games, special events, picnicking, and open play; a new civic center; picnic shelters; an expanded tennis complex; and a children's playground.

Blue Jacket Park, Orlando, Florida

Central Park Transformed into a 1st Class Urban Park

The Peck Center is envisioned as a multi-cultural, multi-dimensional Arts, Education, and Culture Center; that offers a variety of programs and activities for residents and visitors of all ages including music, theater, dance, and arts and crafts; and programs in addition to serving as the City's Head Start Center.

Florida Center & Golfers Playhouse, Naples, Florida

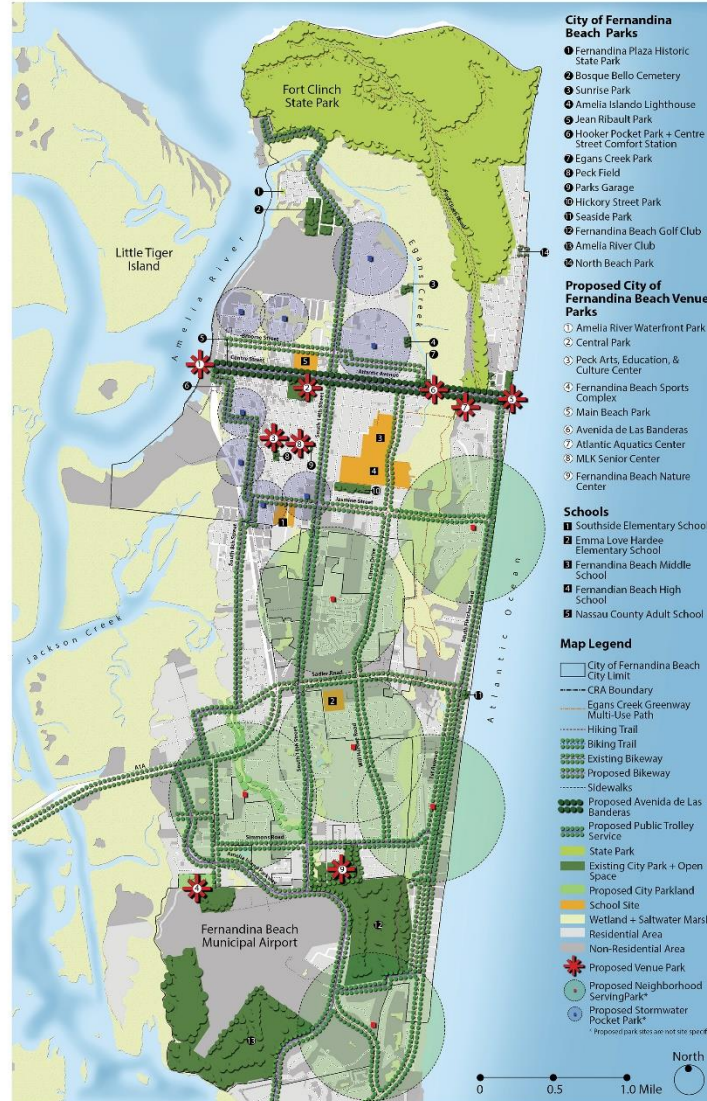

Peck Center Transformed into the Peck Arts, Education, and Culture Center

The existing Athletic Complex is envisioned as an expanded City of Fernandina Beach Sports Complex, providing competition-level facilities for baseball, softball, soccer, football, and lacrosse as well as 1st class support facilities such as concessions, restrooms, pavilions, parking, a central plaza and playground and trail network.

Spanish River Athletic Complex, Boca Raton, Florida

Fernandina Sports Complex Expanded and Enhanced into a 1st Class Sports Complex

City of Fernandina Beach Parks

- 1 Fernandina Plaza Historic State Park
- 2 Bosque Bello Cemetery
- 3 Sunrise Park
- 4 Amelia Island Lighthouse
- 5 Jean Ribault Park
- 6 Hooker Pocket Park + Centre Street Comfort Station
- 7 Egans Creek Park
- 8 Peck Field
- 9 Parks Garage
- 10 Hickory Street Park
- 11 Seaside Park
- 12 Fernandina Beach Golf Club
- 13 Amelia River Club
- 14 North Beach Park

Proposed City of Fernandina Beach Venue Parks

- 1 Amelia River Waterfront Park
- 2 Central Park
- 3 Peck Arts, Education & Culture Center
- 4 Fernandina Beach Sports Complex
- 5 Main Beach Park
- 6 Avenida de Las Banderas
- 7 Atlantic Aquatics Center
- 8 MLK Senior Center
- 9 Fernandina Beach Nature Center

Schools

- 1 Southside Elementary School
- 2 Emma Love Hardee Elementary School
- 3 Fernandina Beach Middle School
- 4 Fernandina Beach High School
- 5 Nassau County Adult School

Map Legend

- City of Fernandina Beach City Limit
- CRA Boundary
- Egans Creek Greenway Multi-Use Path
- Hiking Trail
- Biking Trail
- Existing Bikeway
- Proposed Bikeway
- Sidewalks
- Proposed Avenida de Las Banderas
- Proposed Public Trolley Service
- State Park
- Existing City Park + Open Space
- Proposed City Parkland
- School Site
- Wetland + Saltwater Marsh
- Residential Area
- Non-Residential Area
- Proposed Venue Park
- Proposed Neighborhood Serving Park*
- Proposed Stormwater Pocket Park*

*Proposed park sites are not site specific

Main Beach is envisioned as an exciting Beachfront Park with new concessions, restaurants, and shops; multi-purpose event lawns; a beachfront promenade; individual and group picnic pavilions; an expanded skate/extreme sports park; beach volleyball courts; new restrooms; and other "place making" amenities.

Venice Beach, Venice Beach, California

Main Beach Transformed into a 1st Class Beachfront Park

Atlantic Avenue is envisioned as the "Avenida de Las Banderas" (Avenue of the Flags) in recognition of the City's rich history. As a "complete street", 2 mile corridor would be lined by the eight national flags that once flew over the City; shady street trees; wide sidewalks for pedestrians, bike lanes for cyclists; and festive trolleys ferrying residents and visitors.

Hamburg, New York

Atlantic Avenue Transformed into La Avenida de Las Banderas

The Atlantic Recreation Center is proposed as the Atlantic Aquatics Center. In addition to the existing lap pool and splash pad, the Center would also provide a water-slide, lazy river, and expanded deck space. Existing buildings would be renovated to provide 1st offices, classrooms, concessions, meeting space, lockers, and gymnasium.

Barnstable Bay Aquatics Complex, Palm Beach, Florida

Atlantic Recreation Center Transformed into Atlantic Aquatics Center

The existing MLK Center is envisioned as the converted and renovated MLK Senior Center, serving the needs of residents and visitors City-wide and providing a variety of senior activities and programs.

Bethesda Park Senior Center, Lawrenceville, Georgia

MLK Center Expanded and Enhanced into MLK Senior Center

The 30 Acre Airport Site is envisioned as the City of Fernandina Beach Nature Center. The center would provide a variety of exhibition and programs about Amelia Island's unique natural habitat. The nature center may include interpretive signage, a lecture hall, classrooms, a gift shop, and exhibit halls.

Green City Nature Center, Palm Beach Gardens, Florida

30 Acre Airport Site Transformed into the City of Fernandina Beach Nature Center

City of Fernandina Beach Parks + Recreation System Vision Framework

Activity-Based (Neighborhood) Model

Attend Indoor Programs and Classes
10,000 – 30,000 sq.ft. Community Center =
1.5 – 3 Acres

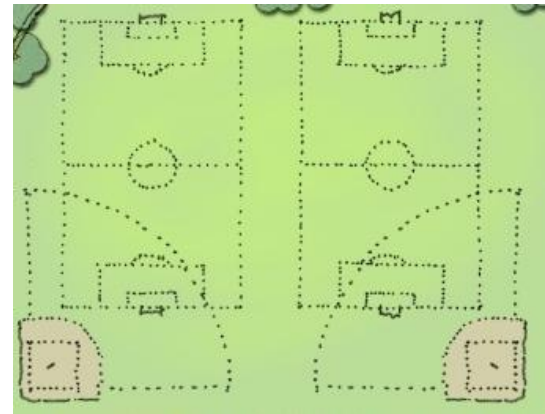

Play Basketball/ Tennis =
0.5 – 1 Acre

Play in a Splash Play Area =
0.25 – 0.5 Acres

Walk a Dog (Off-Leash) =
0.25 – 5 Acre

Play a Pick-Up Game, Throw Frisbee =
0.5 Acres

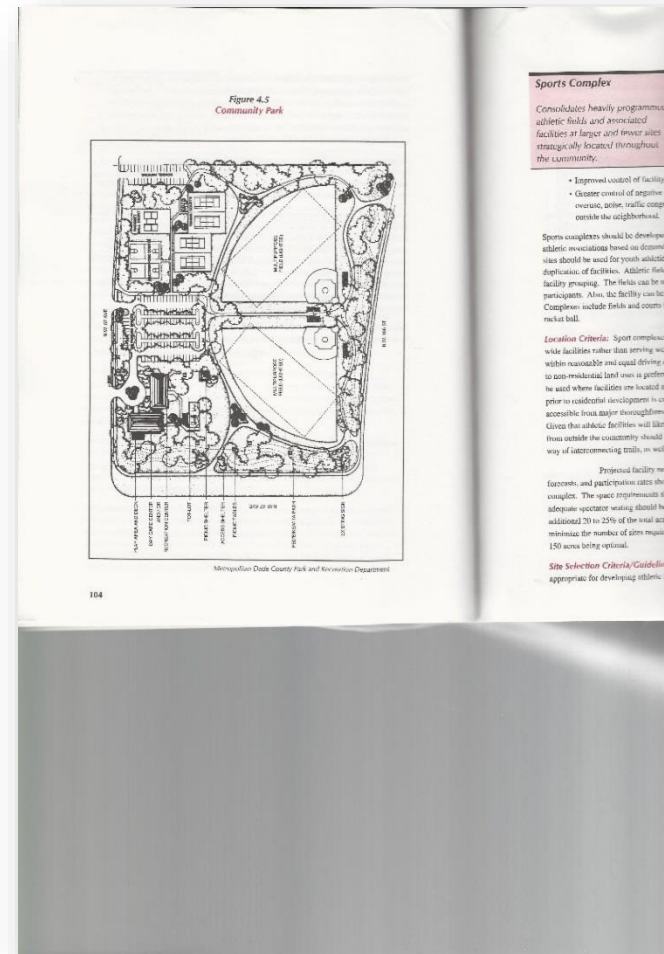

NYC Soccer “Field”

PARK CLASSIFICATIONS, PLACE-MAKING

Traditional Classifications - NRPA, 1996

Parks, Open Space, and Pathways Classifications Table				
Parks and Open Space Classifications				
Classification	General Description	Location Criteria	Size Criteria	Application of LOS
Mini-Park	Used to address limited, isolated or unique recreational needs.	Less than a 1/4 mile distance to residential setting.	Between 2500 sq. ft. and one acre in size.	Yes
Neighborhood Park	Neighborhood park remains the basic unit of the park system and serves as the recreational and social focus of the neighborhood. Focus is on informal active and passive recreation.	1/4 to 1/2 mile distance and is demarcated by non-residential roads and other physical barriers.	5 acres is considered minimum size, 8 to 10 acres is optimal.	Yes
School-Park	Depending on circumstances, combining parks with school sites can fulfill the space requirements for other classes or parks, such as neighborhood, community, sports complex, and special use.	Determined by location of school district property.	Variable—depends on function.	Yes — but should not count school only uses.
Community Park	Serve broader purpose than neighborhood park. Focus is on meeting community-based recreation needs, as well as preserving unique landscapes and open spaces.	Determined by the quality and suitability of the site. Usually serves two or more neighborhoods and 1/2 to 3 mile distance.	As needed to accommodate desired uses. Usually between 30 and 50 acres.	Yes
Large Urban Park	Large urban parks serve a broader purpose than community parks and are used when community and neighborhood parks are not adequate to serve the needs of the community. Focus is on meeting community-based recreational needs, as well as preserving unique landscapes and open spaces.	Determined by the quality and suitability of the site. Usually serves the entire community.	As needed to accommodate desired uses. Usually a minimum of 50 acres, with 75 or more acres being optimal.	Yes
Nature/Resource Areas	Land used solely for preservation of significant natural resources, natural landscapes, open spaces, and visual aesthetics/buffering.	Resource availability and opportunity.	Variable.	No
Greenways	Effectively tie park system components together to form a continuous park environment.	Resource availability and opportunity.	Variable.	No
Sports Complex	Consolidates heavily programmed athletic fields and associated facilities to larger and fewer sites strategically located throughout the community.	Strategically located community-wide facilities.	Determined by projected demand. Usually a minimum of 25 acres, with 40 to 60 acres being optimal.	Yes
Special Use	Covers a broad range of parks and recreation on facilities oriented toward single-purpose use.	Variable—dependent on specific use.	Variable.	Depends on type of use.
Private Parks / Recreation Facility	Parks and recreation facilities that are privately owned yet contribute to the public park and recreation system.	Variable—dependent on specific use.	Variable.	Depends on type of use.

Non-Traditional Classifications

Sarasota County, FL

Example: Preserves

Example: Athletic Fields

- 3-tiered classification for each subsystem
- Used to establish basis for level of quality, budget, staffing, maintenance
- “Base” Tier: most common, basic amenities, basic maintenance, low/ no fees
- “Top” Tier: least common, full amenities, higher level of maintenance, higher cost recovery

Most Residents Want Their Basic Needs Met Within their Neighborhood or Community

- Take a Walk or Run
- Ride a Bike
- Walk the Dog
- Play on a Playground
- Throw or Kick a Ball, Frisbee
- Sit Outside, Eat, Read, Talk with Friends and Neighbors
- Play a Pick-up Game, Practice Sports
- Fish
- Attend a Local Event, Festival, Market

Activities vs. Facilities

- Places to play vs. playground
- Places to relax vs. benches
- Places to eat and socialize vs. picnic tables
- Places to play ball vs. athletic fields
- Places to play hoops vs. basketball court
- Places to exercise vs. fitness center

Placemaking (PPS)

- Key Attributes
- Characteristics
- Metrics

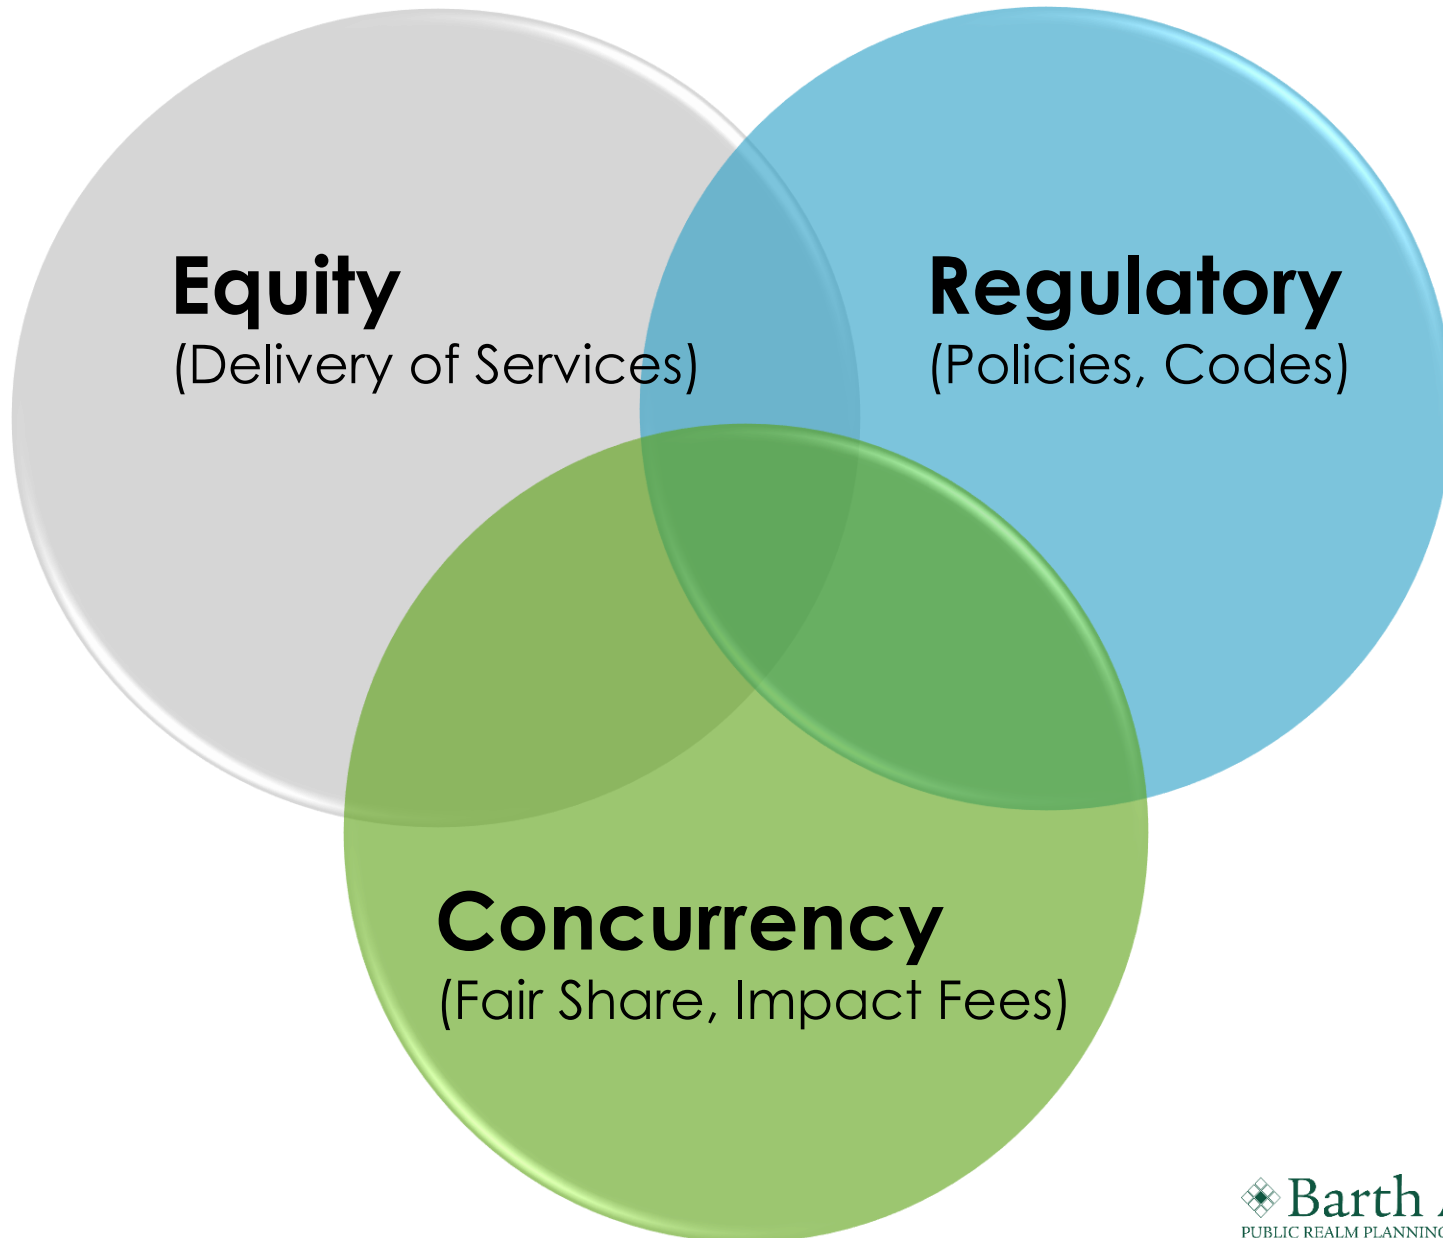

“Power of Ten”

1. Get something to eat
2. Play bocce ball
3. Throw a frisbee
4. Fly a kite
5. Swing
6. Sunbathe
7. Read a book
8. Wi-Fi access
9. Rent a kayak
10. Use the playground

LEVEL OF SERVICE ANALYSIS

Reasons to Calculate LOS

No Standards

“A standard for parks and recreation cannot be universal, nor can one city be compared with another even though they are similar in many respects”
(Mertes & Hall, 1996, p. 59).

A Project of the
National Recreation and Park Association
and the American Academy for
Park and Recreation Administration

Park, Recreation, Open Space and Greenway Guidelines

James D. Mertes, Ph.D., CLP and James R. Hall, CLP

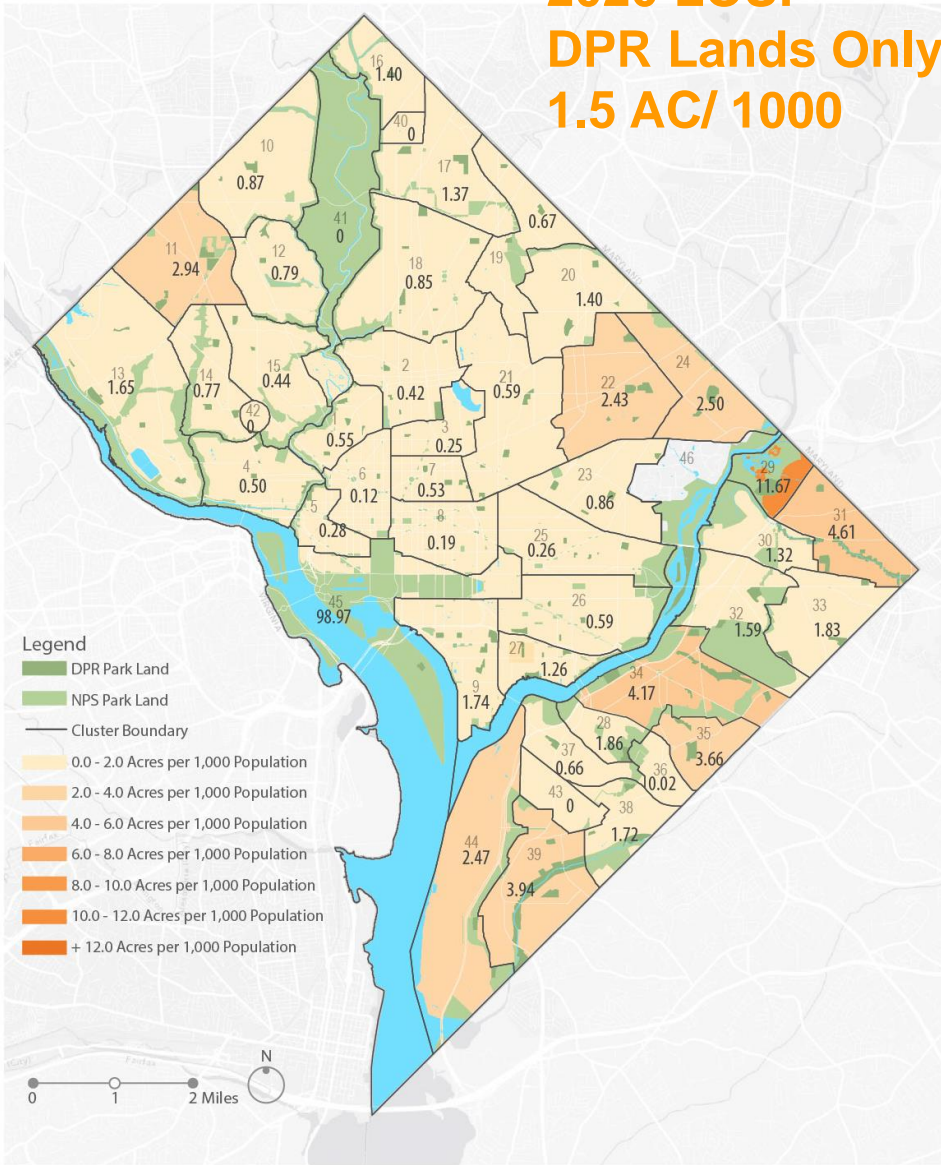

Common LOS Metrics

each “necessary but not sufficient”

- **Acres per 1000 residents** – Do we have enough land? Community-wide? Equitably distributed?
- **Facilities per 1000 residents (public, private)** – Do we have enough facilities? Community-wide? Equitably distributed?
- **Square footage per capita** – Do we have enough indoor recreation space? Community-wide? Equitably distributed?
- **Access by transit, car, bike, foot** – Can I get there safely, easily, and comfortably? Regardless of age, income, ability? Urban or rural?
- **Quality of facilities** – Is quality consistent and equitable across the system?
- **Operating expenditures per acre managed** – Do we have enough money to operate effectively?
- **Operating expenditures per capita** - Ditto
- **Revenue per capita** – Are we generating adequate revenues that meet expectations?
- **Revenue as a percentage of total operating expenditures (cost recovery)** - Ditto

Parkland Acreage LOS – What, Where to Count?

**2020 LOS:
DPR Lands Only
1.5 AC/ 1000**

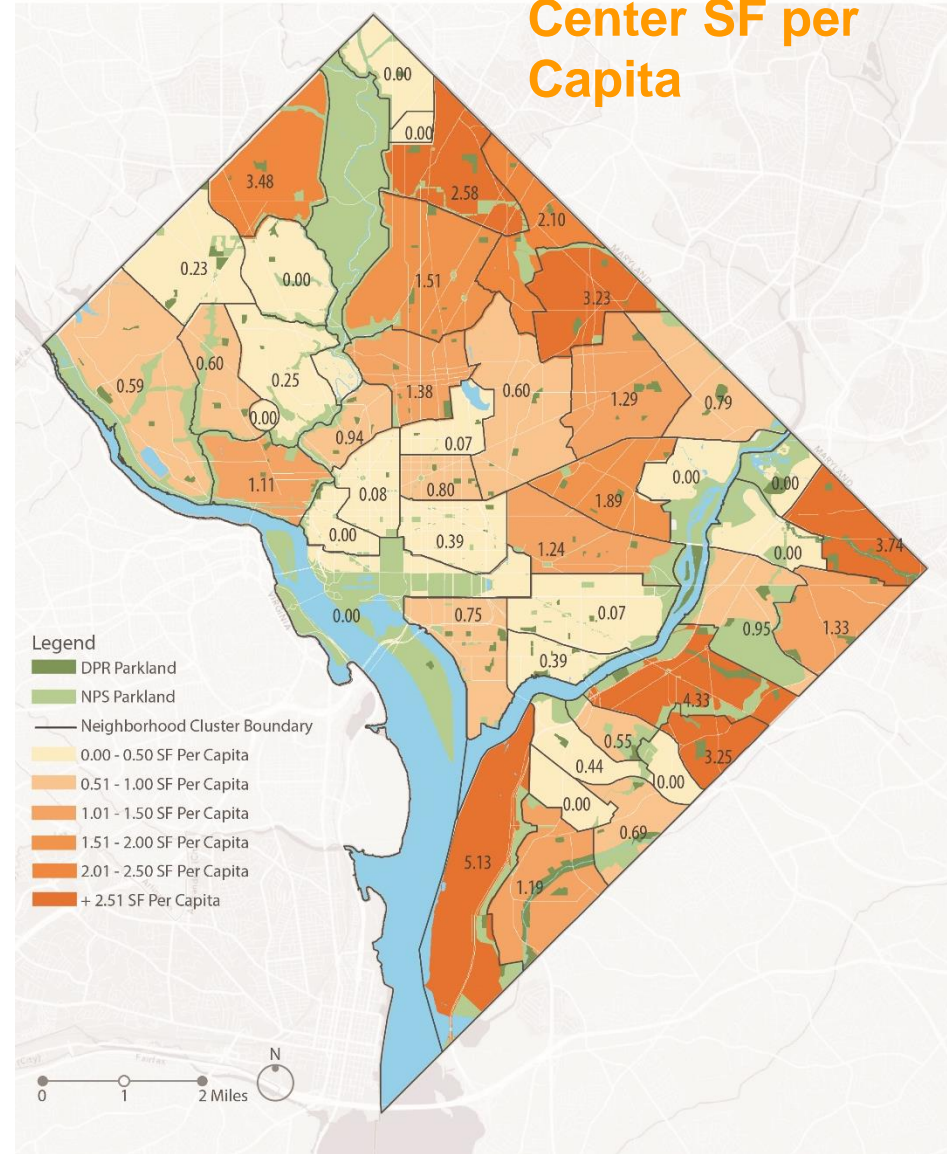

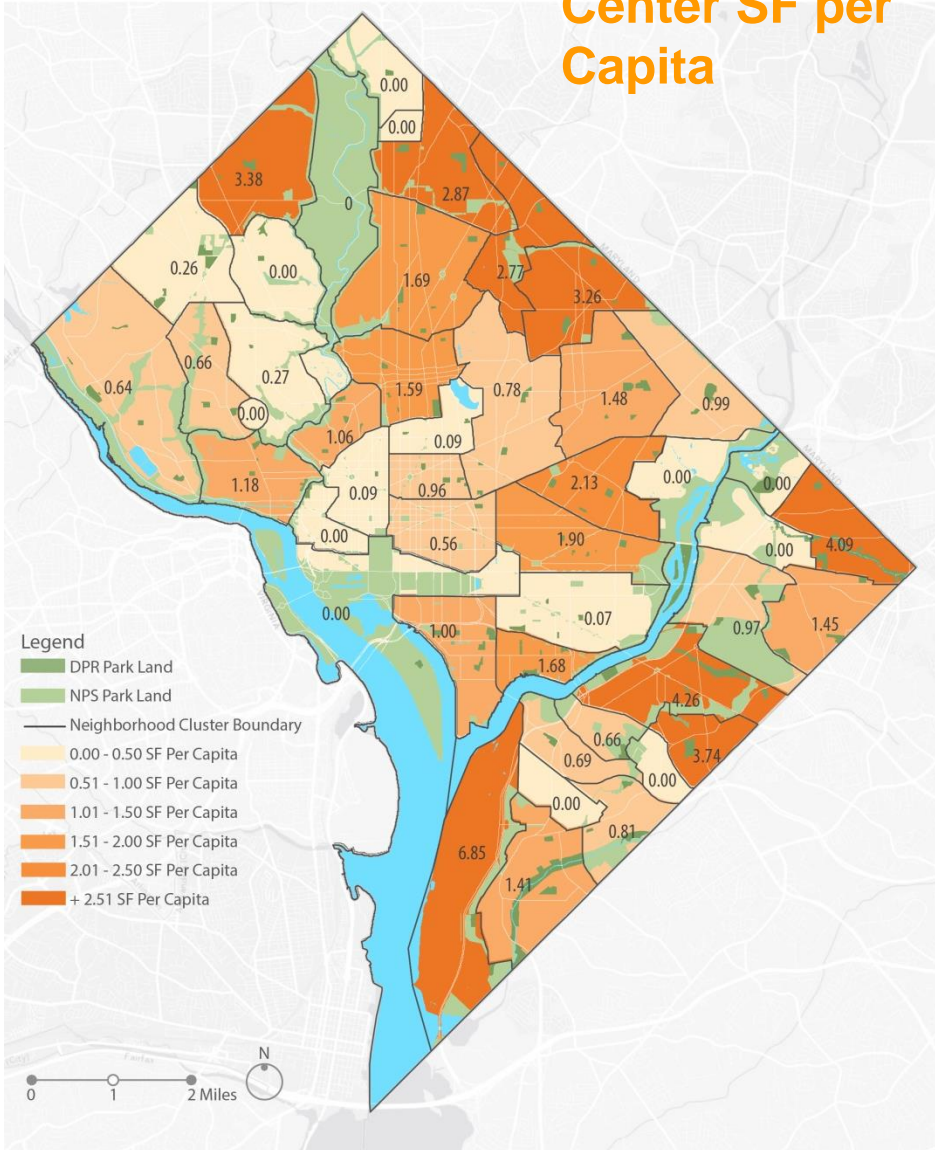

**2020 LOS:
DPR + NPS Lands
7.6 AC/ 1000**

Sustainability Metrics, Trends as LOS Standards

Trends	Potential Metrics
Age-Friendly Communities	Transit Access; % of Senior Participants; % of Multi-generational Programs
Walkability and Connectivity	Percentage of Complete Streets; Miles of Multi-purpose Trails; % of Parks w/ Multi-Modal Access
Access to Nature	Distance/ Time to Natural Areas; % Participants in Nature-Based Programs
Sports Tourism	% Use of Facilities by Visitors % Cost per Visitor User Revenues per Visitor User
High Performance Public Spaces©	

Phase I: Criteria for HPPSs – Delphi Process

Social

- Improves the neighborhood
- Improves social and physical mobility
- Encourages health and fitness
- Provides relief from urban congestion, stressors
- Provides places for formal and informal social gathering, art, performances, events
- Provides opportunities for individual, group, passive and active recreation
- Facilitates shared experiences among different groups
- Attracts diverse populations
- Promotes creative and constructive social interaction

Environmental

- Uses energy, water, and resources efficiently
- Improves water quality of both surface and ground water
- Serves as a net carbon sink
- Enhances, preserves, promotes, or contributes to biological diversity
- Hardscape materials selected for longevity of service, social/ cultural/ historical sustainability, regional availability, low carbon footprint
- Provides opportunities to enhance environmental awareness and knowledge
- Serves as an interconnected node within larger scale ecological corridors and natural habitat

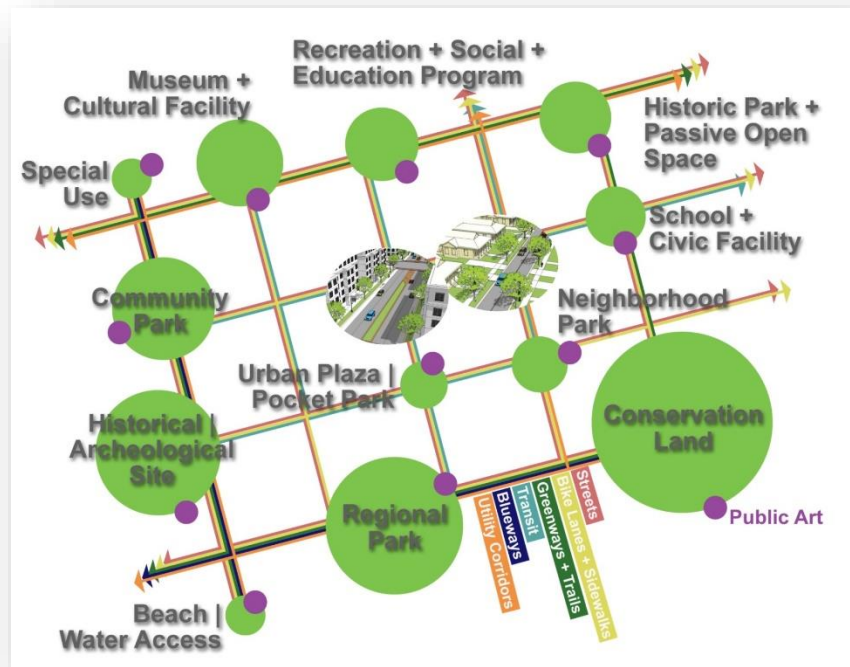

Economic

- Creates and facilitates revenue-generating opportunities for the public and/or the private sectors
- Creates meaningful and desirable employment
- Indirectly creates or sustains good, living wage jobs
- Sustains or increases property values
- Catalyzes infill development and/or the re-use of obsolete or under-used buildings or spaces
- Attracts new residents
- Attracts new businesses
- Generates increased business and tax revenues
- Optimizes operations and maintenance costs

ESTABLISHING LOS STANDARDS

Select Subsystems

- Parks
- Recreation Centers
- Athletic Facilities
- Greenways and Trails
- Playgrounds
- Dog Parks
- Aquatics Facilities
- Programs
- Environmental Lands
- Museums, Historic, Cultural Facilities
- Water Access
- Civic Spaces
- Streets, Transit
- Stormwater Facilities, Utility Corridors
- Others

Establish Park and Facility Classifications

Example: Preserves

Example: Athletic Fields

- 3-tiered classification for each subsystem
- Used to establish basis for level of quality, budget, staffing, maintenance
- “Base” Tier: most common, basic amenities, basic maintenance, low/ no fees
- “Top” Tier: least common, full amenities, higher level of maintenance, higher cost recovery

Select Subsystem Service Delivery Model(s)

Select Appropriate Metrics for Measuring LOS for Each Subsystem, Classification

- **Acres per 1000 residents** – Do we have enough land? Community-wide? Equitably distributed?
- **Facilities per 1000 residents (public, private)** – Do we have enough facilities? Community-wide? Equitably distributed?
- **Square footage per capita** – Do we have enough indoor recreation space? Community-wide? Equitably distributed?
- **Access by transit, car, bike, foot** – Can I get there safely, easily, and comfortably? Regardless of age, income, ability? Urban or rural?
- **Quality of facilities** – Is quality consistent and equitable across the system?
- **Operating expenditures per acre managed** – Do we have enough money to operate effectively?
- **Operating expenditures per capita** - Ditto
- **Revenue per capita** – Are we generating adequate revenues that meet expectations?
- **Revenue as a percentage of total operating expenditures (cost recovery)** - Ditto

Calculate Supply/Demand: Community-wide, Geographic, Special Interest

- Calculate existing LOS (supply)
- Determine needs via analysis, observations, surveys, focus group meetings, interviews, benchmarking, visioning (demand)

Benchmarking

- NRPA PRORAGIS
- TPL Parkscore
- State SCORP
- Local Comparables

NRPA PRORAGIS

Community Standards

Communicating the effectiveness — and the funding needs — of a park and recreation department begins with reliable measurement. NRPA draws upon the PRORAGIS database to help agencies apply a set of national benchmarking standards as starting points for their conversations with local officials and stakeholders. Starting in 2014, NRPA issued Community Standards Reports to agencies participating in the PRORAGIS survey.² These custom reports provide agencies with their own data, shown in comparison with aggregate national data. The reports summarize agency performance according to five key metrics involving size, operating costs and revenue. They also show agencies exactly how they compare when it comes to the types of facilities they offer relative to their population size.

Included here is a generic summary of the 2014 PRORAGIS community standards so that you can apply the data to your own agency numbers.

Are you adequately funded?

Figure 4 and 5 — which show agencies' operating expenditure per acre and per capita — provide a good starting point for benchmarking your agency's funding.

Do you have enough parkland?

To advocate for more parkland, you need to know how you compare with both the national average and other agencies with similar population densities. Figure 6 shows those averages.

How much are you making?

One measure of agency performance is their ability to fund their own operations through revenues from classes, entry fees, concessions, etc. Figure 7 shows revenue per capita averages across various population densities.

* If you are interested in receiving the custom Community Standards report, showing your agency in relation to others of similar size and character, go to www.nrpa.org/PRORAGIS for detailed information.

Figure 5 Operating Expenditures per Capita

Figure 4 Operating Expenditures per Acre

Figure 6 Acres per 1,000 Population

The second revenue metric (Figure 8) focuses on cost recovery. While cost-recovery plans vary greatly by facility type, purpose and the demographic served using data from other agencies can help your agency frame a realistic cost-recovery plan.

Do you have enough facilities?

Are you looking to make a case for new facilities? It's useful to compare the number and type of facilities your agency offers with national median figures, as well as with similar-sized agencies. Figure 9 shows 20 different facility types along with median, upper-quartile and lower-quartile percentages of agencies that listed those facilities in their PRORAGIS survey.

Figure 7 Revenues per Capita

Figure 8 Revenue as a % of Operating Expenditures (Cost Recovery)

Figure 9 Jurisdiction Population per Facility

Selected Facilities	Departments Offering	Number of Responses	Lower Quartile	Median	Upper Quartile	Average
Recreational/community center	78.5%	524	13,942	24,804	46,358	35,092

Golf courses (population per 9 holes)	31.5%	155	12,720	26,288	52,414	40,359

TPL ParkScore

The screenshot shows the TPL ParkScore 2015 website. At the top left is the logo for 'THE TRUST FOR PUBLIC LAND' and 'ParkScore® 2015'. On the top right, there are navigation links: 'GO TO TPL.ORG', 'FAQ', 'LOG IN', and a red 'DONATE' button. Below this is a horizontal menu with 'RANKINGS', 'CITY PROFILES', 'EXPLORE', 'COMPARE', 'METHODOLOGY', and 'ABOUT'. The main content area features a large banner for 'Compare & explore city park systems' with images of the Golden Gate Bridge and the Statue of Liberty. To the left of the banner is a '75 LARGEST CITIES AND THEIR PARK SYSTEMS' section with a list of cities: ALBUQUERQUE, ANAHEIM, ANCHORAGE, ARLINGTON, and ATLANTA, and a 'VIEW DETAILED RESULTS' button. Below the banner are five small square icons, with the third one highlighted in blue. At the bottom, there are four main sections: 'EXPLORE CITIES' with a map of Charlotte and a 'CHOOSE A CITY' dropdown; 'COMPARE CITIES' with a bar chart comparing 'ACCESS TO PARKS' for Austin, Denver, and LA, and a 'SIDE-BY-SIDE COMPARISONS' button; 'IMPROVE YOUR PARKSCORE' with a photo of people and a 'FOR PLANNERS' button; and 'WHAT IS A PARKSCORE EXPLAINED' with three park bench icons and an 'OUR METHODOLOGY' button. A vertical red bar on the right side of the last section contains the word 'EXPLAINED'.

Top Five Outdoor Recreation Opportunities: Residents & Tourists

See Appendix G for full list of outdoor recreation participation by activity

Figure 4.1

at 49 percent. This was followed closely by wildlife viewing at 48 percent. Picnicking, swimming in public outdoor pools, visiting archaeological and historic sites, hiking and saltwater fishing had the next highest levels of participation. Participation rates for the other activities ranged from 14 percent for both bicycling and freshwater beach use to 2 percent for soccer and football.

that outdoor recreation is important to them; this includes 72 percent who think it is very important and 24 percent who think it is somewhat important. The results are similar among tourists: 98 percent say outdoor recreation is important to them personally (65 percent saying very important and 33 percent saying somewhat important).

Motivations for Participation

An important aspect of planning for outdoor recreation is understanding why people recreate; what motivates them to get

Importance of Recreation

The participation survey determined that nearly all Florida residents (96 percent) say

Soccer

Region	% of Participation*		Total Participation**		Level of Service (Fields/1,000 Participants)	
	Residents	Tourists	2011	2020	2011	2020
Northwest	5	2	222,934	255,235	0.74	0.65
North Central	10	2	125,351	140,270	1.06	0.95
Northeast	7	2	227,196	264,488	0.83	0.71
Central West	11	2	563,896	643,856	0.54	0.47
Central	11	2	915,252	1,078,534	0.35	0.30
Central East	9	2	268,709	307,960	0.84	0.74
Southwest	10	2	361,942	424,190	0.52	0.45
Southeast	15	2	1,157,059	1,278,165	0.48	0.43
Statewide	11	2	3,798,144	4,351,926	0.56	0.49

* Percent of participation represents the percentage of residents and tourists who participated in activity at least one time during the year.
 ** Total participants represents the combined number of residents and tourists who participated in activity at least one time during the year.
 BOLD numbers represent a number below the statewide median.

Calculate Supply/Demand: Community-wide, Geographic, Special Interest

- Calculate existing LOS (supply)
- Determine needs via analysis, observations, surveys, focus group meetings, interviews, benchmarking, visioning (demand)
- Add demand to supply
- Calculate new LOS
- Re-evaluate, re-calculate

SUMMARY

Needs Assessments and LOS

- Use a comprehensive, triangulated process to determine needs, LOS standards and metrics
- Consider:
 - Do the metrics reflect community values?
 - Are the LOS standards logical, easy to understand?
 - Is accurate data available?
 - Do the metrics represent actual levels of service?
 - Do the metrics and standards provide comprehensive perspective of LOS?
- Engage a representative citizen's group to help establish LOS guidelines, review findings
- Consider context, demographics, land development patterns, density, other variables
- Experiment, adjust, re-calculate, repeat
