Subject: POPS Presentation

Andrew,

I met with DPR leadership, and we have to make some tweaks in our LOS & recommendations. Is it possible to do this tomorrow?:

- Lower the recommended standard for playgrounds: 3,000
- Diamond fields- include all permit only fields except the following:
- Tennis courts-revise the recommended standard to 3,000
- Picnic areas- revise standard to 5,000
- Rectangular fields:
 - include all permit only fields
 - If possible, could we try 3 options for standards (4,000, 4,500, 5,000- to see if the number of fields needed is changing significantly?)- if this is not possible by tomorrow, let's change the rec. standard to 4,500.
- Volleyball courts- revise the rec. standard to 20,000
- Tracks- include only outdoor tracks- 1 County-owned, 1 APS owned
- Community Centers- total number is 14- (9 County-owned & 5 Aps owned)
- Nature centers- change standard to 75,000
- Skate park- 75,000

Please call me when you can so we can discuss the presentation.

Thanks,
Irena

Andrew,

Attached a few slides that we could use for our presentation. Could you please work tomorrow morning on adding slides related to LOS & Land Acquisition? I am sure I will need to share this with Erik and others tomorrow afternoon, so I just want to be ready for that. Let's leave between 15-20 minutes for that part of the presentation.

Thanks,
Irena

Great!

Attached is the presentation we can use for our 2nd call (this is what I am presenting to the Leadership Team tomorrow).

Thank you!

Hi Irena,

Yes, I can stay on the phone after the call. (We can ask Austin how many systems they've worked with that factor into the "typical" LOS number.)

Hi Andrew,

These are the docs I shared with folks that will participate in the call today.
Are you available to stay on the phone after this call, I had some questions related to LOS and the presentation for next week?

Thanks,
Irena

Hi All:

I am attaching a few documents for our meeting tomorrow. These are all still work in progress, but we wanted to focus primarily on the two attached examples from Montgomery County (Calculating Future Ballfield Needs & Expected Field Condition- both Excel files). We are trying to figure out if a similar approach could be used for calculating our field needs. I am also attaching the current draft recommendations regarding synthetic fields & lighting.

Thanks,
Irena

Subject: LOS Question

Andrew,

One important question before my meeting with DPR leadership tomorrow (probably more for Austin): what do we mean by “typical” level of service?

Thanks a lot,
Irena

Irena,

I exchanged a few more emails with Austin. He will be in transit tomorrow but should be able to call us from the road. If something doesn't work out with his phone connection, I will answer what I can.

Andrew

Hi Andrew,

Unfortunately, there is no time on Thursday when everyone is available. Also, we wanted to talk tomorrow so we can have some recommendations for our meeting with DPR leadership that is happening on Thursday morning. Do you think you could answer some of the questions tomorrow?

Thanks,
Irena

Hi Irena,

Austin's travel schedule has changed and he's no longer able to be on a call tomorrow afternoon. Is there time Thursday morning to reschedule?
