Subject: POPS GIS Data - Wetlands

Hello Andrew, below is an explanation of the wetlands data. It is in the Natural Lands layer and the types are listed below.

Sent from my iPad

Cc: Vincent Verweij <Vverweij@arlingtonva.us>, Sarah Archer <Sarcher@arlingtonva.us>
Subject: RE: GIS Data

Jason,

It is in the Parks_NatRes dataset. It is a subset of the Natural Lands feature class. Below are the types used in the RPA.

- Wetland Features: Plant Communities
 - PLANT_COMM
 - Freshwater Tidal Marsh
 - Acidic Woodland Seep
 - Acidic Seepage Swamp
 - Black Willow Red Maple Upland Swamp
 - Terrace Gravel Seepage Bog Fall Line Type
 - Tidal Herbaceous Vegetation Freshwater Tidal Marsh
- Proposed Resource Protection Area

It would be great to have a polygon layer.

Sent from my iPad

On Dec 16, 2016, at 10:40 AM, Alonso Abugattas <Aabugattas@arlingtonva.us> wrote:

Natural lands is the catch all, not sure if it gets too busy to out in much more in the way delineating wetlands. For springs and small such, a blue point has been used, but maybe a small polygon would also work? That may be all we need. Obviously Jason should have the final answer for the larger stuff, but those are my thoughts for such small wetland points as a seep or spring. Thanks.

Subject: Re: GIS Data

Hey guys, thank you for all your help!! One more question . . . How do I map Arlington's wetlands? I'm hoping for something with a polygon. Is this the "Natural lands" layer the way to go, maybe map the polygons associated with the term seep or marsh?

On Dec 15, 2016, at 4:07 PM, Vincent Verweij <Vverweij@arlingtonva.us> wrote:

Hello all,

I had to dig a little for this. The last update I worked on was for the Environmental review points.

The entire database, which includes points, lines, and polygons, can be found here:

L:\Team\PNR-Conservation & Interpretation\Natural Resources Management\NRCA Maps\GIS

Alonso, this is also the database that you should show on your map, and update, if needed. I'll come over to set that up.

Thanks for making us check, Bethany. Made us realize we weren't on the same page.

Subject: RE: GIS Data

Hi Bethany, we don't keep track of nesting sites, as they usually change yearly, depending on species. Though we're conducting a breeding bird survey over the next 2 years, it will only tell us what birds are nesting here rather than which ones. As for geologic significant features, they're found along with the other significant natural resource features layer. Please see attached video for the example of seeing them and others significant natural resources. Not sure what you mean by Natural heritage Resource Inventory. If you mean our biotic inventories, they're quite a few depending on what you're looking for and what we have cataloged so far (plants, butterflies, mammals, reptiles and amphibians, birds, dragonflies/damselflies, incomplete other invertebrate listings, etc.) on the L drive, but again, except for significant/champion ones, they don't have any layer attached to them. At best for plants we have them by park and only certain rare colonies are found on the same GIS map I referred to before. They are in list format, not sure if you have access to them: L:\Team\PNR-Conservation & Interpretation\Natural Resources Management\Wildlife Report, inventories I attached the one for plants with the parks they're found in along with the master wildlife list (just the mammals and herps). I'm not sure if any of these help you though. Please let me know. Thanks.

Hi Andrew, here are the points:

- We do not have a GIS layer for nesting sites/areas
- The Natural Lands layer (attached) contains wetlands. Look for attributed with swamp, seep, marsh in their names.
- I'm still working on the geologic info.

Subject: RE: Bench Marking from 9/14 & Peer Medium from 10/13

Hi Andrew,

Attached are my comments on the additional services proposal. In general, I would just emphasize what is different than in the original scope, and I would probably add under each category how much is the cost proposed to increase for each task. I know that we will also attach the other document that has that info, but I think it will be helpful to include it in this document as well.

As I mentioned, we need a formal letter (memo from you) to accompany these attachments.

Also, please make sure that each attachment contains the name of the project (Public Spaces Master Plan Update), and also at least somewhere the contract number or PO#.

Please let me know if you have any questions.

Thanks,
Irena

Subject: Bench Marking from 9/14 & Peer Medium from 10/13

[REDACTED] and Irena -

Can I please schedule 15 minute with one of you via phone next week to discuss the Benchmarking slides from the 9/14 POPS meeting versus the 10/13 Peer Medium?

I would like to confirm that I understand what these charts are describing and how the green, yellow, and red works on both sets of benchmarks/statistics.

Thank you,

Sports Commission, Chair

Wilfredo Calderon

**ARLINGTON POPS
ADDITIONAL SERVICES PROPOSAL**
September 21, 2016

SCHEDULE

The Arlington POPS process has required more extensive meetings with leadership, staff, and the Advisory Committee than anticipated. However, these meetings have been critical to adequately brief and solicit input from the people who will hopefully be advocates for and implement the plan. Due to this additional engagement, the timeframe of the planning process has been extended. The original schedule projected that the plan would be complete in July 2016. Currently, it is anticipated that the plan will be complete in ~~Spring-Summer 2017~~.

Commented [IL1]: I am not sure if this is realistic, so I would say summer, just in case.

TASK 1.

1.1. PROJECT COORDINATION

Additional coordination by phone and email with the Project Officer. ~~It is projected that~~ Coordination ~~will~~has required more frequent communication than the budgeted bi-weekly phone calls.

Commented [IL2]: I would suggest adding in all of these categories how much additional cost is estimated.

TASK 3. COMMUNITY NEEDS ASSESSMENT

3.1. Public Outreach Strategy

a. Interviews, Focus Groups, Workshops

Interviews/meetings with additional stakeholders ~~not yet engaged~~not anticipated in the original scope, such as the National Park Service.

c. Advisory Committee Meetings

Preparation and coordination for and attendance at four future Advisory Committee meetings.

The Advisory Committee has taken on a more prominent role than originally anticipated. ~~Rather than being a body that simply gets briefed on milestones in plan progress, the Advisory Committee is involved in carefully reviewing and providing feedback on analysis strategy and plan recommendations point by point at every step of the process.~~—This process has been key to understanding the history behind previous plans' recommendations and ensuring the Committee's support of the current plan.

3.3. Standards Development

Continued refinement of standards and development of service areas based on leadership, staff, and Advisory Committee feedback.

~~There are no uniform national standards for the delivery of park and recreation services. The 1994 PSMP included park classifications and service standards, but the 2005 PSMP did not because the 1994 standards were difficult to explain and implement. The current County Board has expressed an interest in having standards that can justify the provision of park and recreation amenities.~~ The unique standards currently being developed for Arlington reflect the county's situation and are based on feedback from leadership, staff, and the Advisory Committee. Because the proposed standards are unique to Arlington, it has required further explanation and review to make certain all parties are in agreement about proceeding.

Commented [IL3]: We already have in the scope that you will develop standards that are tailored to the County, so I would focus on items that are anticipated to be different than in the original scope, such as

3.5. Additional Assessments

Additional meetings to develop policies on dog parks, synthetic turf fields, lighting, and land acquisition.

Dog parks, synthetic turf fields, lighting, and land acquisition are topics that have bubbled up in Arlington since the last PSMP, and there is considerable interest in the guidance the current plan will provide in these areas. Due to this interest, it will be important to craft clear policies that respond to concerns and are achievable. The evaluation and discussion of these polies is ongoing and will exceed the budgeted time assigned to these subtasks.

TASK 4. MASTER PLAN RECOMMENDATIONS

a. **Updates Recommendations**

Additional phone calls and coordination with leadership and staff to get input on recommendations, and corresponding revisions based on this input and Advisory Committee feedback.

b. **Visioning Workshop**

Coordination for and conducting of the proposed visioning charrette, which expands on the originally proposed visioning workshop to be a full-day event that includes non-staff participants.

Staff and the Advisory Committee have expressed a strong interest in the physical and spatial aspects of the plan to a larger degree than originally expected. The proposed charrette builds on this interest and attempts to elevate the level of discourse about the physical components of the plan by engaging designers from the Arlington community.

Commented [IL4]: I would perhaps elaborate here that the original scope envisioned this as a half-day charrette focused on staff & internal stakeholders (please use language from the scope).

Commented [IL5]: I am not sure what this implies?

c. **Conceptual Parks and Recreation Facilities Vision**

Additional synthesis of the outcomes of the proposed visioning charrette and coordination with leadership and staff on the representation of the conceptual vision. The conceptual vision will be an important tool to graphically represent and stitch together the results of the plan's analysis and the physical implications of the plan's policies.

i. **Public Meetings**

Additional preparation for and attendance at upcoming public meetings to ensure alignment of expectations among leadership, staff, and the Advisory Committee.

Commented [IL6]: Perhaps add additional time to develop materials, reviews, etc.

TASK 5. FINAL REPORT

c. **Revisions Based on County Review**

Additional time, if needed, to coordinate with staff on revisions based on input from commissions and advisory groups that will review the draft plan.

g. **County Board Meetings**

Additional briefings or workshops with the County Board, if needed, to present and get input on plan recommendations.

Commented [IL7]: Does this include the CB work session in February (potentially)?

Subject: POPS Presentation

Andrew,

A few more questions:

- What did you include under “picnic areas”? The number doesn’t seem to match what I have. This includes 63 “Grill Areas” from the Miscellaneous_Amenities layer in GIS and 18 “Rentable Picnic Shelters” from the Shade_Structures_Inventory layer in GIS.
- Community centers- I think this one should be highlighted for our call and meeting next week: we don’t have a real sports center; this number includes very small buildings, such as Dawson Terrace, which doesn’t have almost any community use, besides some martial arts classes (this is literally an old, historic building, that doesn’t function as a community center at all, but it is in our inventory. Also, I have 15 centers in my presentation, so our numbers are not matching?
I have 15 in GIS, but I changed it to 14 based on Bethany’s email from 9/12. I can change it back.
- It would be probably good to have, at the end, a summary/conclusion slide, with some bullet points with the most important takeaways?
I agree. I can put together a few points, but I think our Monday conversation will inform that.

Thanks,
Irena

Andrew,

As you probably expected, we will have many questions until this is finalized☺

- Basketball courts: are you counting both indoor and outdoor? In my presentation, I am counting only outdoor, so if you are counting both, it would be helpful that you add(outdoor + indoor), just so it is clear and our presentations are not conflicting.
- For multi-se trails, if we are counting off-street and on-street, it would be good to explain that in the presentation.

-----Original E-mail Below-----

Hi Irena,

Attached is a draft presentation on LOS and vision statements. It is a bit rougher than usual. A few things of note / to discuss:

- On the level of service charts, the current level of service is color coded. Austin looked at where Arlington is already above, within, or below typical standards. In setting the recommended level of service, he took into account how Arlington compares with typical standards—and if there was a need expressed in the survey. For example, if Arlington is above typical standards but there is a need expressed in the survey, he kept the standard high. He can provide more detail on the decision-making process for each.
- The multi-use trail and natural resource conservation area standards, in particular, show a substantial need that may not be feasible to meet. I've already talked with Austin about this, and we should probably discuss this as a group.
- The number of level of service maps is a bit overwhelming, and I'm not sure they need to all be presented—but I wanted to have them here so you could review them.
- I would like to get to a point where we have some “conclusions” from the maps, and we should discuss how that should be presented / how much should be left to the Advisory Committee. As a preliminary measure, you'll see there are slides with circles that highlight areas with poor access. These don't necessarily indicate that you need to add a new facility at every circle.
- I don't believe I received any feedback on the vision statement options, but I included a slide with them at the end since the schedule indicated we would cover that too.

It is horrible timing, but I received a summons for jury duty tomorrow. I should know later this evening if I have to report.

Arlington County Parkland & Assets Inventory

Parkland in Arlington County By The Numbers

- County-owned parkland: 930 acres
- Northern Virginia Regional Park Authority (NOVA Parks)-owned: 145 acres
- Federally-owned: 1,150 acres
Includes:
 - Arlington Cemetery
 - George Washington Memorial Pkwy
 - Iwo Jima Memorial
 - Theodore Roosevelt Island
- Public Access Easements: 33 acres
- Northern Virginia Conservation Trust (NVCT) Easements: (16 acres)

County-owned Parkland

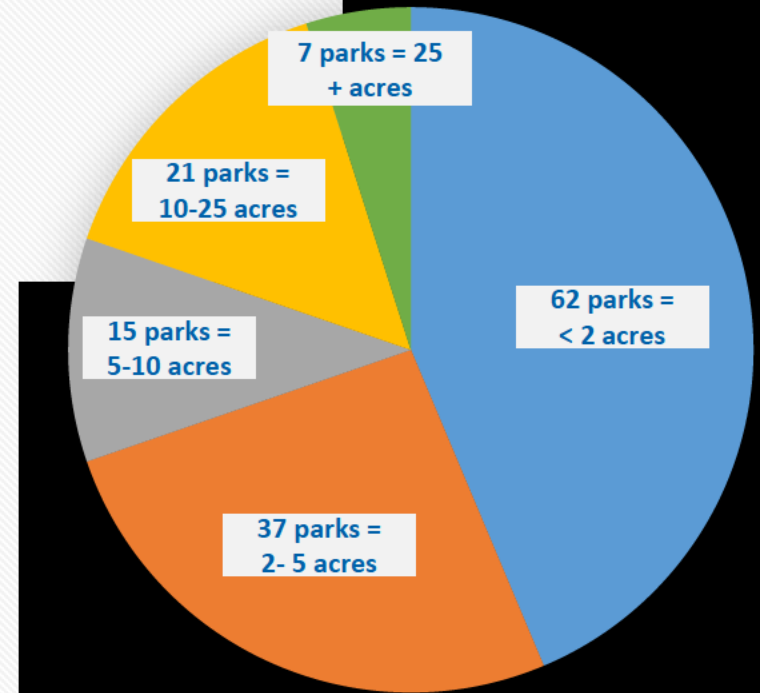

Legend

- Arlington Parks
- Other Parks

- Natural Resource Conservation Areas: 130 acres (14 % of Total County-owned Parkland)
- Resource Protection Areas: 245 acres (27 % of Total County-owned Parkland)

TOTAL COUNTY-OWNED PARKLAND = 930 ACRES / 142

VISIONING CHARRETTE- PROPOSED APPROACH

Purpose

- An invited event devoted to a call for ideas for the physical form of Arlington's public spaces system

Goals

- Provide a different mode of engagement
- Seek informed input on the form of Arlington's public spaces
- Brainstorm ideas that may not otherwise rise to the surface
- **Test prior ideas that may be of interest but have no organized public support**
- Reach different target audience (physical designers, advocates, community leaders)
- Focus on different aspect of POPS: the physical plan
- Add energy to the POPS process and generate excitement about Arlington's spaces

VISIONING CHARRETTE- PROPOSED APPROACH

Timeframe

- 9am–3pm on a Saturday or a Weekday
- **Potential Dates:**

Format

- Presentations followed by hands-on sketch workshop and synthesis.

Potential Invitees:

- POPS Advisory Committee
- Landscape architects
- Architects
- Planners/UDs
- Engineers
- Naturalists
- Artists
- Miscellaneous 5
- Press

Unprogrammed Open Space

Draft Notes

Purpose: To define Unprogrammed Open Space so these areas can be mapped and included in the POPS Level of Service (LOS) analysis.

Definition: Unprogrammed Open Space is an area that is either minimally improved or may include constructed amenities, such as a picnic shelter or athletic court. The area should be minimally programmed, meaning available and open for public use at least 50% of the year. The area should be accessible to the public by way of the public Right-of-Way or paved/unpaved paths. The area should be large enough to accommodate a range of recreational activities, and free of structures or materials that limits activities to one very specific type of recreational use. The property should be available for public use, which includes sites that are privately owned with public access easements.

Examples of what to include:

- Amphitheaters (Lubber Run)
- Areas with grills and picnic tables (Penrose Park)
- Areas with reservable and non-reservable picnic shelters (Alcova Heights & Barcroft)
- Athletic courts with paved surfaces that can accommodate a range of activities/games, such as: tennis, futsal, basketball, handball, and other multipurpose courts. This is in contrast to sand volleyball courts, for example, which can only accommodate activities that involve sand. I don't expect kids to be able to learn to ride their bikes on sand.
- Community Athletic Fields (Barcroft Field #5 & Rocky Run)
- Disc Golf (Bluemont)
- ~~Dog Parks (Shirlington Dog Park)~~
- Fire rings (Lacey Woods)
- Forested areas with or without seating (Penrose Park)
- Landscaped areas with or without seating (Barton Park & Rocky Run)
- Large tracts of land with either paved or unpaved trails (Fort C.F. Smith & Barcroft & Fort Bennett Park and Palisades Trail)
- Open Lawn with or without seating (N. Danville and 11th Street North Park)

Commented [IL1]: For this category we may want to include a minimum area required? If we have 50 sq. ft. of space, does that really count as "unprogrammed space"?

- Outdoor Tracks (Fairlington)

Examples of what not to include:

- Auxiliary Buildings (Restrooms, Concession Stands, Storage Sheds)
- Batting Cages, Dugouts, and Bullpens (Barcroft Athletic Fields)
- Community Gardens (Ten-Barton)
- Indoor and Outdoor Pools (W&L High School, Upton Hill Regional Park)
- Natural land that lacks access to the ROW (19th Road South Park)
- Natural land that lacks paved or unpaved routes (Kirkwood Road Park)
- Natural Resource Conservation Areas (NRCA)
- Outdoor Fitness Stations (Shirlington Park, Fairlington, Rocky Run)
- Outdoor Storage Sites (Barcroft & Long Branch Greenhouses)
- Parking lots
- Permit only athletic fields (such as Barcroft fields 1,2,3, and 6)
- Playgrounds (Playgrounds can't be used for anything other than a playground)
- Skatepark (Powhatan Springs)
- Sprayground
- ~~Volleyball Courts with Sand or Stonedust Surfacing (the sand/stonedust makes it difficult to use the site for other purposes — except building sand castles)~~

Commented [IL2]: I agree, as long we can

Need More Discussion on:

- Heavily sloped areas (think of the southern portion of South Park . . . not useable now, but might be useable once the trail/staircase is constructed?)
- Long linear parks (like Four Mile Run . . . not much room to throw a Frisbee in certain areas)
- Plazas
- Rain Gardens (think of the one at Long Bridge Park that has the walkway . . . versus the one at Glencarlyn that you can look at but cannot walk across)
