I see. I spoke to the GIS staff who did the trails and they have no plans to do more updates in the near future. So this data layer may not have everything you need.

Thanks, Bethany. If you wouldn't mind resending the trails layers again, it would be helpful. When you sent the unpaved trails, I think it also included some paved trails that weren't part of the original trails layer—so I want to make sure I'm categorizing them correctly.

**Subject:** RE: POPS Inventory Info

Hey guys, see my comments below in **bold blue**

- **Can the trails in the GIS layer be coded as hiking or multi-purpose trails? The trails in the GIS "Trails" layer are multi-use trails, on-street lanes, and sharrows. There is a separate GIS layer that, I think, I forwarded to you that has unpaved trails that could be used to identify hiking trails. Let me know if you need me to re/send that layer to you.**
- **Open grass fields- what do we mean by that category? Do we have any sense how often are these programmed? Are they used as diamond/rectangular fields? They are used as rectangle fields. If you**

look at the “Sports Scheduled” attribute column, you will see they are all used for soccer. They are programmed every day in the Spring and Fall.

- Small game courts: what are unmarked and multi-use courts? Unmarked Courts don't have nets, baskets, asphalt striping, or other athletic accessories needed to play a specific sport. They are kept for general drop-in uses, like toddlers riding their tricycles. The Multi-Use courts are used for a variety of activities that are not specific to basketball, volleyball, or tennis. There should be a column that tells you all the activities that take place in these spaces. These courts are typically locked and not accessible to the public.
- Green, un-programmed spaces- how can we map these?

Did I miss anything?

Thanks,  
Irena

Andrew,

I remember that we talked about this, but I wanted to mention it anyway. Would it be possible/important to show fields/courts that are lighted?

We could also leave that for our SD1 discussion, if that is more appropriate.

Thanks,  
Irena

No, on the covered bench . . . Yes, for the rentable picnic shelter. The covered benches are typically located along trails (like the 4MR Trail) and not in picnic areas.

**From:** Irena Lazic  
**Sent:** Friday, September 30, 2016 11:40 AM  
**To:** adobshinsky@wrtdesign.com  
**Subject:** Upcoming POPS Meeting Approach

Here is what we propose as an approach for the upcoming POPS Advisory Committee meeting (October 13):

- Introduction
  - Public Spaces System Overview (a few slides showing our current parkland/assets, to get people to think about what we have now, and set up a context for the LOS discussion)
  - Level of Services Methodology (brief recap of LOS methodology and approach- presented by David Barth)
- LOS Analysis & Results- Spatial and Population based
- Discussion:
  - Questions and suggestions about LOS results
  - Specific discussion about “unprogrammed spaces”? The Advisory Committee expressed a desire to include “unprogrammed spaces” in LOS analysis. There is currently no GIS layer for this category, and one is needed for LOS. In order for us to create this, we have to have a clear agreement about what do we consider under “unprogrammed spaces”. At this meeting, we would give the Committee a few options and examples and ask them to help us define “unprogrammed spaces”.
- Next Steps: Upcoming Meetings & Charrette

**Subject:** RE: POPS LOS

Andrew,

Why don't we do the following: we could have two separate maps: one showing all fields, and the other one, showing only fields that have some community use. The reason why I would prefer this option is that even though some fields may be permit only now, they could always be re-programmed to allow for community use in the future.

What do you think? Is that too difficult?

Thanks,  
Irena

Irena,

I agree. I remember hearing that there are few fields that are permit only, but those should be removed from the spatial analysis. If you can send me a list, I will make sure to take them out. We should do the same for any other facilities that are never available for community use.

**Subject:** POPS LOS

Andrew,

I am going through the Advisory Committee meeting summaries you provided. One of the things that was mentioned is that the Committee wanted to see that "Level of service is taking into account whether fields are accessible for community use". Is there any way we can address this? I think we could explore separating fields that are permit only and the ones that have community use? I think that that general comment applies to other facilities that could be reserved.

What do you think?

Thanks,

Irena

**Subject:** Call Tomorrow & Other Items

Hi Andrew,

Do you have some time for a call tomorrow to go over some comments we had regarding the land acquisition document, synthetic fields, dog parks, David Barth, PROS, etc.? I only have meeting between 11am-1pm tomorrow, so my schedule is pretty flexible.

Also, I haven't received any additional feedback on the LOS approach, so I would move forward based on the feedback from the DPR leadership meeting and Advisory Committee meeting.  
I forwarded an email to you from David Goodman regarding Trail LOS, and I think we should talk about this during our call on Wednesday.

One more thing related to the meeting summaries: the last two meeting summaries we've received were very detailed (which is great, and it helps us track all of the comments we receive). However, in order to keep consistency with previous meeting summaries, would it be possible to provide a summary of different comments rather than refer to specific action steps (you did that for the meeting on August 3-attached). I want to post them online, and I think that that format would work much better.

Thanks,  
Irena

**Cc:** Irena Lazic <ilazic@arlingtonva.us>  
**Subject:** POPS - Benchmarking Data for Arlington County

Hey guys, here is the latest numbers. I'm still working on the stuff highlighted in yellow.

### **POPULATION AND PARKLAND**

- Population Estimate as of July 1, 2016: 221,800
- County land area (acres): approximately 16,640 acres
- Acres of Parkland: 1,075 acres
  - 930 acres of Arlington County Owned Parkland
  - 145 acres of NOVA Parks (includes W&OD Trail, Upton Hills Park, and Potomac Overlook)
- Individual Parks: 145 parks
  - 142 Arlington County Owned Parks
  - 3 NOVA Parks (includes W&OD Trail, Upton Hills Park, and Potomac Overlook)

### **LEAGUES AND PARTNERSHIPS**

- League Partnerships: TBD
- Private Park Support Groups: TBD
- Number of contracts with non-profit orgs: TBD

### **RECREATIONAL AMENITIES.**

- Ball Diamonds: 35 . . . . The County also has 19 Combination fields that can be used for both diamond and rectangular sports. The fields can be switched seasonally, as needed. Andrew, I'm not sure if you want to add these to the count?

- Basketball Hoops: 135
  - 48 Indoor Hoops . . . only includes school sites where the school and community center occupy the same building.
  - 87 Outdoor Hoops . . . includes half and full size courts . . . does NOT include school courts
- Community Gardens: 7 gardens . . . approximately 5 acres of Community Gardens . . . I included the acres because I think it is more significant than the number of gardens.
- Community Garden Plots: 262 Full Size Plots
- Playgrounds: 72 . . . includes all playgrounds owned and/or maintained by the County
- Off-leash Dog Parks: 8
- Park Restrooms: TBD Stalls
- Skateparks: 1
- Tennis Courts: 92 courts (87 full and 5 half courts)
- Tournament Fields: TBD
- Practice Fields: TBD
- Nature Centers
  - 2 Arlington County
  - 1 NOVA Parks . . . this nature center is not maintained by Arlington County
- Recreation or Senior Centers: 14
- Gymnasiums: 7 . . . we lost one with the Barcroft renovations

## STAFFING

Permanent Staff (FTEs): 249 staff

Seasonal Staff (FTEs): 658 staff . . . this number is actually “Temporary FTEs” because determining “Seasonal” seemed to be too complicated.

## CLASSES AND PROGRAMMING

Number of program Users: XYZ

**Cc:** Erik Beach <Ebeach@arlingtonva.us>; David Patton - DES <Dpatton@arlingtonva.us>  
**Subject:** trails LOS standards

Hi Irena,  
I found this document by the FHWA that helps quantify level of service (LOS) for shared use trails.  
<https://www.fhwa.dot.gov/publications/research/safety/pedbike/05138/>

With it, we can now:

- a) determine what LOS we currently have at different times of the day, day of the week and even seasonally
- b) decide what LOS we want to establish at the policy level as a preferred or minimum
- c) know what width is appropriate to design for the LOS we choose

You'll see on the tables in Appendix C they've even adjusted them to account for the relative dominance of different users (bicycle-heavy, pedestrian-heavy or balanced).

As you know, we have many years of counts on most of our major trails, broken out by travel mode in 15 minute increments. So figuring out current LOS for various periods of time shouldn't be very hard. After that we can start to have a conversation with the community about what LOS we should *plan* for.

Let's meet up when it works best for you to incorporate this into the POPS plan.

**To:** Andrew Dobshinsky  
**Subject:** POPS Committee Meetings

Andrew,

Please see below the results of our Doole Poll.

I think that we should schedule these dates in the fall:

- October 13 (LOS)
- November 9 (SD1)
- December 20 (Land Acquisition)

With a possible charrette in December, this gives us enough time to prepare thoroughly for these meetings.

What do you think?

Thanks,  
Irena

**To:** Andrew Dobshinsky  
**Subject:** POPS- Next Steps

Hi Andrew,

I have to share info on the upcoming steps in the POSP process with CMO/CB.

Does this sound reasonable?

- **Fall:** The POPS Advisory Committee and the Core Team will continue to meet to discuss action plan elements and develop preliminary recommendations for land acquisition, Level of Service, definitions, synthetic turf and lighting, and address other important topics.
- **Early December:** Visioning Charrette. This would be an invited event devoted to a call for ideas for the physical form of Arlington's public space system. The goal of this charrette would be to reach a different targeted audience (designers, advocates, community leaders) to brainstorm ideas that may not otherwise rise to the surface.
- **December:** County Board briefings
- **January 2017:** Second series of public meetings where a draft action plan would be presented to the public.
- **February, 2017:** County Board Work Session
- **March/April, 2017:** Third series of public meeting to present a draft plan to the community
- **Spring 2017:** Commission Reviews
- **Late Spring/Early Summer:** County Board Approval

Thank you.

Andrew,

I am trying to respond to Heather's questions below, and I wanted to make sure that I am providing her with clear directions. Could you please tell me if this makes any sense? Please feel free to suggest any revisions.

Thanks a lot,  
Irena

Hi Heather,

Thanks for reaching out and asking for clarification.

Currently, this slide splits various facilities in two categories: "Facilities with Numeric & Spatial Level of Service (LOS)" and "Facilities with Numeric LOS only". We are asking you to tell us which facilities you think would be appropriate to have both Spatial & Numeric LOS and which would need Numeric LOS only.

Numeric LOS would basically be a number of population served by a specific facility: for example, 1 dog park per 30,000 people. Numeric LOS would be based on the needs assessment and best practices.

Spatial LOS adds a spatial component, and would be appropriate for the facilities you expect to be located in a certain distance from a place of residence (we are proposing here different travel times to measure this distance, for example, a 10 minute travel time in low density areas and 5 minute travel time in high density areas for playgrounds). In this case, you would expect to get to a playground in a 5 or 10 minute walking distance (we would also add other mode of transportation where applicable, e.g., cycling, public transit, driving). Some facilities, such as nature centers, for

example, you would probably expect to have somewhere in the County but not necessarily in any specific proximity from your place of residence (in that case, we would apply only Numeric LOS and say: the County needs x number of nature centers per 100,000 people).

**Cc:** Laura Lazour <Llazou@arlingtonva.us>  
**Subject:** Re: Draft presentation to the 4MRV Working Group

Everyone,

I've continued to examine the POPS data and find a message there that is being lost at the summary level that DPR presents. I know they present at that level for simplicity's sake, and that's understandable.

However, in looking at the detailed data, I noted that the percentage of respondents in older age categories was far greater than the proportion of they represent in the total county population, while the percent of respondents under the age of 35 was far lower than the total. For example, 43% of survey respondents were age 55 and older but they represent about 25% of the total county population. Therefore, their needs and interests have disproportionate effect on survey results when they are averaged across all respondents.

This is important because people aged 35-54 make up about one-third of total population, and when you add kids to their percentage, you have about half the county's total population.

When survey results are examined by age group, it turns out that people in the 35-54 year age range or people in their households (possibly their kids) consistently have a greater need for sports related facilities and programs than the survey average. Their need for nature facilities and dog parks mirrors the average, but their need for sports facilities is greater and is being overshadowed in the survey by the older age groups who not have such needs.

For example, 38% of all respondents expressed a need for rectangular fields compared to 52-58% of the 35-54 age range. 41% on average need playgrounds compared to 70% aged 35-44. 63% on average need a pool compared to 72-81% aged 35-54. 28% on average need indoor sports facilities compared to 40-45% aged 35-54.

I will build this message into my slides and I will keep hammering it in the working group but we need to talk to DPR about also getting this message out there when they talk about POPS. Understanding the true needs of half of the county's residents will help us better address their needs and avoid making costly mistakes.

It looks good to me. I replaced Slide 13 with the version from last week and moved the "We are here" arrow on Slide 14.

Since the GIS analysis used Census 2010 figures, the total population was 207,627. With 126 playgrounds, that is about 1,648 people/playground.

3:00 works for me.

**Subject:** CB Briefings- Revised Presentation

Andrew,

Attached is the revised presentation.

I need your help with 2 things:

- Slide 13- Plan Organization: you revised this slide last week, based on Carrie's questions, could you please send me the new version?
- LOS-maps: Could you please give me the numbers we are using for playgrounds- County average per facility?

Let me know if you have any comments on the revisions I made.

Thanks a lot,  
Irena

Irena,

The Thursday, September 8 meeting works for us. On September 15, Eric and I will have to participate in a conference call between the County Board briefings. Can we schedule the LOS meeting before or after the Core Team Meeting on the 14<sup>th</sup> or before the first briefing on the 15<sup>th</sup>?

**Subject:** POPS- Meetings

Andrew,

I will schedule a meeting with Erik and Eric & us on this Thursday, September 8, 11:00am – 1:00pm, if that works for you? We will talk about: POPS scope (additional meetings), [REDACTED] questions, and any other outstanding items. Also, I will schedule a work session to talk about LOS on September 15, 2-3:30pm.

Let me know if this works.

Thanks,  
Irena

guys, I think that we can use the map with different colored dots for the presentation, and we can change that next week if anyone has any comments.

thank you!

Irena

Thanks Andrew. No comments on the LOS mapping. All very cool stuff and I think Irena is collecting input/feedback.

Hi Bethany,

Since they're ready, attached are the revised Action Plan in Word format and the revised Advisory Committee presentation. I am still working on the County Manager presentation.

Any additional thoughts on the LOS mapping?

Andrew

Andrew,  
Please send us the revised version of the CMO and CB presentation when ready. It would be great if this one could be ready by Tuesday?  
Thank you.

Hi Jane,

Attached are the comments I received from Michael Peter related to the Strategic Directions 7&8 (Fiscal Sustainability & Operations and Maintenance). Could you please review his comments, especially 7.1.4. & 7.1.5., and we can work with Andrew to revise these if needed?

Also, please let me know if you have any additional suggestions on the attached presentation for the Advisory Committee.

Thank you.  
Irena
