Subject: Getting started with AWS

Chris

During our whiteboard session last week, the question was asked about getting started with AWS. With that being said, I wanted to make you aware of a set of resources that walks you through the steps to select, procure and deploy AWS in complex purchasing environments <https://aws.amazon.com/how-to-buy/>. It includes content on topics such as cost justification, contract vehicles, making use of different instance types, implementing cloud-first policies, and selecting partners and/or professional services resources to assist with your transition to AWS. [Please feel free to reach out to me if you have questions or concerns.](#)

Thanks

Kelley DuBois
