Data Warehouse Client Data Master

- All clients who have applied (regardless of their application outcome) for one of DHS services are included in the DHS client pool.
- Client demographic data comes from 8 source systems.
- The Client Data Master table contains a single client record with the best demographic information based on recency and weight value of source system data (VA Tech R code). The unique client record has been determined via rules of merge process (VA Tech R code) to be the same person.
- DHSID is ISB's designated authority for providing DHS-wide IDs.

Column Name	DataType	Length	Description
DHSID	bigint	8	DHS-wide client ID (primary key)
R_DHSID	bigint	255	DHSID of the parent for aliased records
~~AliasInd~~	char	1	Indicates client record to be an alias record tied to another client record
FirstName	varchar	50	Client's first name (given name)
MiddleName	varchar	50	Client's middle (additional) given name
LastName	varchar	50	Client's last (family) name
Gendercode	varchar	5	Gender code
RaceCode	varchar	10	The code that identifies a person's race
IsHispanicInd	varchar	10	Indicates a person of Hispanic origin
MaritalStatusInd	varchar	10	The code that identifies a person's marital status
BirthDate	datetime	8	Date of birth
SSN	varchar	15	Social Security Number
MedicareID	Varchar	20	Medicare ID number; aka Health Insurance Claim Number (HICN)
ImmigrationStatusCode	varchar	10	The code that identifies a person's immigration status in the United States
PrimaryLanguageCode	varchar	10	The code that identifies the language in which a person receives assistance
EducationLevelCode	varchar	10	The code that identifies the amount of education that a person has received
VeteranStatusCode	varchar	10	The code that describes a person's status as a military veteran
ResidenceHouseNumber	varchar	50	The number that identifies the specific parcel of land on which a person lives
ResidenceStreetDirectionInd	varchar	10	The code that indicates which side of town a person lives on
ResidenceStreetName	varchar	50	The name of the street on which a person lives

ResidenceStreetType	varchar	10	The word used to describe the type of roadway on which a person's residence is located
ResidenceAptNumber	varchar	7	The number that identifies the apartment in which a person lives
ResidenceCityName	varchar	50	The name of the city in which a person lives
ResidenceStateCode	varchar	10	The code that identifies the state in which a person lives
ResidenceZipCode	varchar	20	The postal code assigned to a person's address
HomePhoneNumber	varchar	20	The phone number of the client's residence
WorkPhoneNumber	varchar	20	Client's phone number at work
CellPhoneNumber	varchar	20	Client's cell phone number
SourceID_DMC	varchar	255	DMC source ID(s) created from the R code deduplication process
SourceID_Welligent	varchar	255	Welligent source ID(s) created from the R code deduplication process
SourceID_ETO	varchar	255	ETO source ID(s) created from the R code deduplication process
SourceID_ETO_HMIS	varchar	255	ETO HMIS source ID(s) created from the R code deduplication process
SourceID_Yardi_HCV	varchar	255	Yardi Housing Choice Voucher (HCV)/Section 8 source ID(s) created from the R code deduplication process
SourceID_Yardi_LocalHousing	varchar	255	Yardi Local Housing and Benefits source ID(s) created from the R deduplication process
SourceID_WebVision	varchar	255	WebVision source ID(s) created from the R deduplication process
SourceID_VACMS	varchar	255	VACMS source ID(s) created from the R deduplication process
SourceID_VAMMIS	varchar	255	VAMMIS source ID(s) created from the R deduplication process
SourceID_PeerPlace	varchar	255	PeerPlace source ID(s) created from the R deduplication process
ClientActiveInd	varchar	2	Indicates the client is currently receiving service in a program
InsertDate	datetime	8	Date of insert
LastUpdateDate	datetime	8	Date of update
