CAUTION: EXTERNAL EMAIL

Matt: I missed this email earlier. I'm glad you enjoyed the pictures! If you end up traveling out, let me know and I can see about my brother in law arranging a good tour for you. Libby

Thank you Libby! It looks like Hogwarts! Amazing and so great of you to follow up. I am putting it on our travel list for sure. I hope you had a great holiday and look forward to seeing you again soon. I especially look forward to working with you on all things Amazon and beyond - if you ever need me please feel free to reach out.

All my best!  
Matt

Matt: Happy New Year! I'm getting back to you with pictures from the EPIC campus in Verona Wisconsin I mentioned at the NVTC legislative conference. I thought it would be an easy thing to find a link on-line about the campus and send it to you, but it was not easy. EPIC is privately held. There are on-line pictures, but they emphasize the size of the campus rather than the whimsy of it, which is my interest. That meant I had to fall back on personal pictures on my iPhone over the years. And try to eliminate the ones with family in them. Here are 11 to give you some sense of what they do.

I started with some outdoor pictures: "life" size dinosaurs, the outside and interior of their first meeting center (the tree house), and one of the newest buildings (the castle)

Then some interior shots from the castle: an office door (the theme continues), a cafeteria modeled on the train station in Harry Potter, a dragon in a cage under a stairwell, a Victorian bird cage with a baby dragon in it.

Then some interior shots from the farmhouse: the top of the silo which has great views and the stuffed sheep that gets carried around by employees as they feel like it and turns up odd places; the spotted cow meeting room,

And a final bit of art typical of what is scattered throughout the campus, which I used for my FaceBook picture for several years.

What I want to convey is the sense of fun about the whole campus. And discovery. It's an adventure just walking around. I know Amazon does innovative buildings and there would be limits to what they can do here, but EPIC might be of interest to folks brainstorming about what can be done. If anyone is really interested, a trip to Verona (outside of

Madison) would be a very good idea. And they'd have fun. It feels like an adult theme park to me.

Thanks for your good work with Arlington as the whole project moves forward. This is a very exciting time for JBG and Arlington. For Amazon, too, I think. All best, Libby
